Information on deforestation-free products (EUDR)

Dear Sir or Madam,

Würth Elektronik eiSos GmbH & Co. KG (WE eiSos), as a manufacturer of electronic components, is aware of its responsibility as a globally active company and is committed to the sustainable and environmentally friendly use of natural resources. Accordingly, we also see the need to combat deforestation and forest degradation worldwide and are working intensively on the implementation of EU Regulation 2023/1115 on deforestation-free products (EUDR).

Ensuring the uninterrupted supply of high-quality products is important to us, and guaranteeing marketability is our top priority. Accordingly, it is very important for us to optimize our processes in accordance with the requirements of the EUDR.

At this stage, we have contacted our productions and upstream suppliers to obtain all relevant information. We would also like to inform you that the implementation of the EUDR has been postponed by one year and will now come into effect on December 30, 2025. We continue to closely monitor the political developments regarding this new regulation. Due to the dynamic nature of this issue and the questions that remain unanswered in terms of legislation, it is not possible for us to make general statements about all products and associated processes at this time.
