

## Studentday ELECTRONICA

### ENOUGH OF THEORY? WE MET@ELECTRONICA!

There was also a lot going on on the last day of the world's leading trade fair electronica in Munich. Together with 45 students, we were at the electronica student day on the last day.

Early in the morning, we set off from Waldenburg on our way to Munich by coach. On the way, we picked up the registered students from the universities of Heilbronn, Aalen and Augsburg and fortified ourselves for the day with breakfast on the bus. Once we arrived at electronica, we first received some information about Würth Elektronik. Afterwards, the students had enough free time to look around and inform themselves at electronica.

Since we also want to share our expertise with the students, Mario Möller gave an interesting and entertaining lecture on EMC basics for the students.

Finally, we all met at our Würth Elektronik booth to exchange ideas and share our experiences. Based on the feedback and the atmosphere, everyone enjoyed it very much - and who knows, maybe the students will be our customers or colleagues in the future.
