

## VDE Bayern Future Forum 2024: Artificial Intelligence

### A New Paradigm for the Technology of Tomorrow?

From May 10 to 11, 2024, this year's VDE Bayern Future Forum took place at the University of Bayreuth. The event, in cooperation with the Faculty of Engineering and under the patronage of the Bavarian Digital Minister Dr. Fabian Mehring, was all about artificial intelligence (AI).

More than 200 participants had the opportunity to exchange views on current developments and trends in the field of AI. In lectures, workshops and discussions, various aspects were highlighted, including areas of application, ethical questions and technological innovations. We were also able to make our contribution here. Tanja Hochschild, Head of Digitalization and IT, spoke about the effects of AI on the labor market.

This year's VDE Future Forum was once again a successful event for networking, and new contacts and cooperation opportunities were created.

Conclusion: Artificial intelligence is not just a buzzword, but already the technology of tomorrow today. We can look forward to seeing what further progress and innovations await us in this area.
